

Noel Lynch Draughting & Design

Established in 1997, Noel Lynch Draughting and Design is a contract draughting service based in Virginia, Co. Cavan, Republic of Ireland. Using Tekla Structures we produce technical drawings for a variety of industries.

Details can be 2D, 3D perspective or 3D rendered as required.

We can provide an additional resource to your existing drawing office or act as your drawing office, thereby reducing your overheads (staff, training, hardware, software, maintenance, etc.)

Many of our clients simply email us their engineering / architectural plans and we then take the project detailing from pre-approval drafts to site erection details.

We Provide:

- Structural & Architectural Steel Details
- Cladding Details
- Architectural Plans & Detailing
- 3D Rendered Views
- Precast Concrete Details
