PRO-FAB Detailing is an innovative steel detailing company committed to delivering specialist steel detailing to the engineering and construction industry. We utilize the latest steel detailing technology including the 3D computer modelling system, design and detailing software to provide precise shop drawings for a smooth & cost effective fabrication and informative erection drawings for an easy erection at job site.

PRO-FAB Detailing is a preferred steel design and detailing partner because of strong analytical capabilities and error-free hi-quality detail drawings in the fastest possible schedule, and which is cost effective in terms of fabrication and erection costs. Our innovative team of expert detailers can meet the most demanding requirements of our clients delivering high quality even with complex structures like staircases, glass balustrades and all kind of secondary steelwork. We value our clients as our valued partners to deliver the best, as we understand they deserve the best.

PRO-FAB Detailing Ltd. 65 Westfarm Crescent, Glasgow, G72 7RW.
