

360

Structural Detailing LLP

360 Structural Detailing LLP was formed by Directors Richard Walker, Chris Haw and Phillip Welsh in 2011. We provide sub-contract Structural Steelwork Detailing services to Steelwork Fabricators across the country. Our client base varies from small local Fabricators to multinational Engineering companies.

We exclusively use Tekla Structures software. This means that we can fully integrate with your existing detailing system if you are already a Tekla user. Alternatively we can create a system to suit your needs.

We have vast experience in the use of Tekla Structures, which has allowed us to develop an in-depth knowledge of the software so that we can use it to full potential. This helps us to consistently deliver contracts on time and on budget.

All the drawings we produce (Assembly, Single Parts, GA's) are fully edited to the highest standards before being issued to the client to ensure a smooth run through the production process.

All of our draughtsmen have a huge amount of experience as Structural Steel Detailers and have experience in all types of structure from Portal Frames to Multi Storey Office Buildings, Refurbishments to Art Galleries, Architectural Metalwork to Feature Stairs; you name it we've worked on it. You can rest assured that your contract however big or small is in safe hands with 360 Structural Detailing LLP.

Should you wish to discuss our current capacity, enquiry information, or simply to talk to someone to learn a little more about our company and the quality of service that we are able to offer please contact Richard Walker, Chris Haw or Phillip Welsh via the contact details below.
