

TEKLA® Structures

Viewer

Visualise, Share and View

> TEKLA STRUCTURES VIEWER – IDEAL FOR:

- > *Checkers to view the model, open drawings, add dimensions, print drawings, produce reports (e.g. assembly lists)*
- > *Main contractors, consulting engineers, architects or owners to view the project progress and inquire information from the model*
- > *On-site to view the model, drawings, or e.g. erection progress*

CAN DO:

- > View full model
- > View reference models
- > Collaborate on-line using the model
- > Open property dialogs for viewing
- > Display part characteristics
- > Get information on structural elements (length, weight, etc.)
- > Measure and check lengths, angles, etc.
- > Make inquiries for object information
- > Colorization by attributes
- > Open and print drawings (general layouts and fabrication sketches)
- > Open, edit and print drawings with edits
- > Create and print reports and lists
- > Export drawings to DXF and DWG format
- > In v13.0, animate project progress with 4D feature

CAN'T DO:

- > Model any parts
- > Save anything
- > Save edited drawings
- > Create CNC-DSTV
- > Set automatic part marks
- > Import data

> You already know how profitable it is to collaborate and share building information right from the beginning of a project lifecycle. Tekla Structures is the ideal tool for consulting and presenting a structure at any stage in the design process.

> Using the Tekla Structures, Viewer, you can be connected to the same model with the rest of the project team members, who work with the same 3D model simultaneously, regardless of their location or discipline. You can follow the progress of the model in real time as it is being built.

> The affordable Tekla Structures, Viewer licence enables opening and viewing any Tekla Structures model. You can fly through the entire model, rotate it to any angle desired, or perform visual and geometrical checking. Furthermore, you can print any drawings already generated in the model or create and print any reports at any time. The Tekla Structures, Viewer licence is key and password protected.
