HRD claimable course
program no.
10001154252

This instructor-led online BIM-based training course is open for Tekla Structures users in Malaysia only. This course will be conducted in English. The program is designed for BIM modellers and detailers who are new to Tekla Structures. It covers applications of Tekla Structures on projects, from structural modeling, reporting and drawing generation with default setting of Tekla Structures

Course information

This program equips trainees with the key functionalities of Tekla Structures in handling actual projects.

This online course takes four full days to complete.

On completion of this course, trainees are expected to master the following skill sets:

- Structural element modeling
- Connection detailing
- Report generation
- Layout drawing and shop drawing generation

Agenda

Day 1

Create, Open and Saving of Models

Modeling environment navigation

Handling of Model Views

Create and Modification of Grids

Object Selection and Snapping

Copy, Mirror and Moving of Objects

Reference Model importing

Modeling of Structural Objects

Day 2

Modeling of Construction Objects and Points

Cutting of Structural Objects

Handling of Part Chamfer

Day 3

Create Bolted and Welded Connection

Create Customized Components

Day 4

Create General Arrangement Drawing

Assign Assembly and Part Mark

Create Fabrication Shop Drawing

Modification of Drawing Properties

Print drawing to PDF and CAD format

Generation of Material Report

Taufik Musa

Taufik Musa is currently a Technical Specialist in Trimble Solutions Malaysia. He provides technical support to Tekla Structures customers and partners for both Concrete and Steel, performs technical pre-sales demo, conducts training courses and project consultancy across SEA region. He also manages customer feedback and product localization. He has more than 6 years of experience in Steel Detailing services and was involved in numerous Onshore and Offshore Projects.
