Scope

This document provides additional information to what is presented in the [Tekla Security Center](#).

The scope of the information is the Tekla Developer Center service which is part of Tekla Online Service portfolio.

Tekla Developer Center overview

Tekla Developer Center is a service dedicated for partners and customers who develop complementary applications and integrations that add value to Tekla software. The service contains Tekla software API reference documentations, programming guides, coding exercises, code examples and related information.

The Tekla Partners Program is described in Tekla Developer Center. Tekla Partners Program members can promote their development expertise via the Tekla Developer Center service.

Tekla Partners Program members and customers with a valid maintenance license get access to the Tekla Discussion Forum where they can post questions about Tekla software APIs, discuss with other developers and share their best practices. See Tekla Discussion Forum security white paper for more information.

Tekla Developer Center related services

Tekla Developer Center service uses the following services:

Tekla Account service (ATC) contains Tekla Online profiles which users create when they first sign in to Tekla Online services. In addition to the user profile information, Tekla Account service contains user's company (e.g. organization), online licenses and access rights, and authorization to the use of the Tekla Online services.

Trimble Identity service (TID) is an identity service provider for Trimble products, including Tekla products and services. It provides single sign-in and authentication to the services.

Tekla Online Admin Tool is a service for organization administrators to manage and control their users and licenses of their organization.

Tekla Developer Center security

The Tekla Developer Center service is covered by the security measures and processes described in the [Tekla Security Center](#). Service specific details are described in this chapter.

Cloud security

Tekla Developer Center service is operating on Amazon AWS platform. We ensure infrastructure security and high availability of our cloud solution by implementing e.g. following measures to the infrastructure: hardened Linux hosts with automatic patching, isolated VPC, Role-based access control and security groups, and 24x7 SOC Team monitoring alerts. Solutions are architected for resilience and high availability and have AWS Shield and AWS WAF Protection.

General information on AWS security can be found in [AWS Whitepapers & Guides](#)

Personal Data in Tekla Developer Center

Personal data

The Tekla Online profile and Tekla Developer Center contain personal data of users.

Image 1. Personal data in Tekla Developer Center

Upon creating a new Tekla Online profile, the user provides mandatory personal data (such as name and email) and agrees to the [Terms of Services](#).

When signing in to Tekla Developer Center, the Tekla Online profile data, user's organization, user's access rights and information about the Tekla Partners Program license is synchronized to the service profile.

Access to personal data

Access to personal information in Tekla Developer Center is restricted to service administrators only.

We process and protect all personal data according to the descriptions in the [Privacy Notice](#).

Tekla Developer Center data center geographical location

We use the Amazon Web Services (AWS) global cloud infrastructure, which is available within 21 geographic regions around the world.

The AWS infrastructure is designed to deliver a flexible, reliable, scalable, and secure cloud computing environment with a high quality global network performance.

Data center locations of the services are:

Service	Location	Service provider and region
Tekla Developer Center	Ireland	AWS Europe (Ireland)
Tekla Online profile	Ireland	AWS Europe (Ireland)
Tekla Online Admin Tool	Ireland	AWS Europe (Ireland)
Trimble Identity service	US	AWS US (Oregon)

Contact Information
