

# Tekla Structures

## ADVANCED STEEL DRAWINGS

### Introduction

- ▶ Overview of steel drawings

### Drawing setup

- ▶ Drawing templates
- ▶ Layouts
- ▶ Drawing settings
- ▶ Drawing wizard

### Drawing generation

- ▶ Generating GA drawings
- ▶ Generating fabrication drawings
- ▶ Sub-assembly drawings
- ▶ Multisheets
- ▶ Cloning drawings
- ▶ Drawing lists
- ▶ Object level settings

### Output

- ▶ Printing and issuing drawings

## Overview

Building on your existing knowledge of Tekla Structures, this advanced training course will teach you everything you need to know concerning steel drawing production.

You will work through exercises covering the creation and editing of GA and fabrication drawings, explore drawing settings and learn how to produce drawings that contain the correct information and styling to suit your company requirements. Utilise tools and functionality designed to enhance your drawing production speed and efficiency.
